Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 14-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Uchiyama et al. (U.S. Patent No. 6,128,063 “Uchiyama”).

Regarding claim 14, Uchiyama discloses a display device having:

a display panel having panel side connection wiring (Figure 14 element 28);
a first wiring board having an insulation base (Figure 14 element 14, left board), a driving circuit element (Figure 11 element 4) for driving the display panel, a first wiring path (Figure 11 element 8) connected to the driving circuit (Figure 11), a second wiring path (Figures 11 part of elements 5 and 27 connected to element 29 and outer line 28) and a third wiring path (Figure 11 separate part of elements 5 and 27 connected to element 29); and

a second wiring board identical to the first wiring board (Figure 14, right side board);

wherein the panel side-connection wiring connects the second wiring path of the first wiring board to the first wiring path of the second wiring board (Figure 14 element 28, line marked with “*” below).

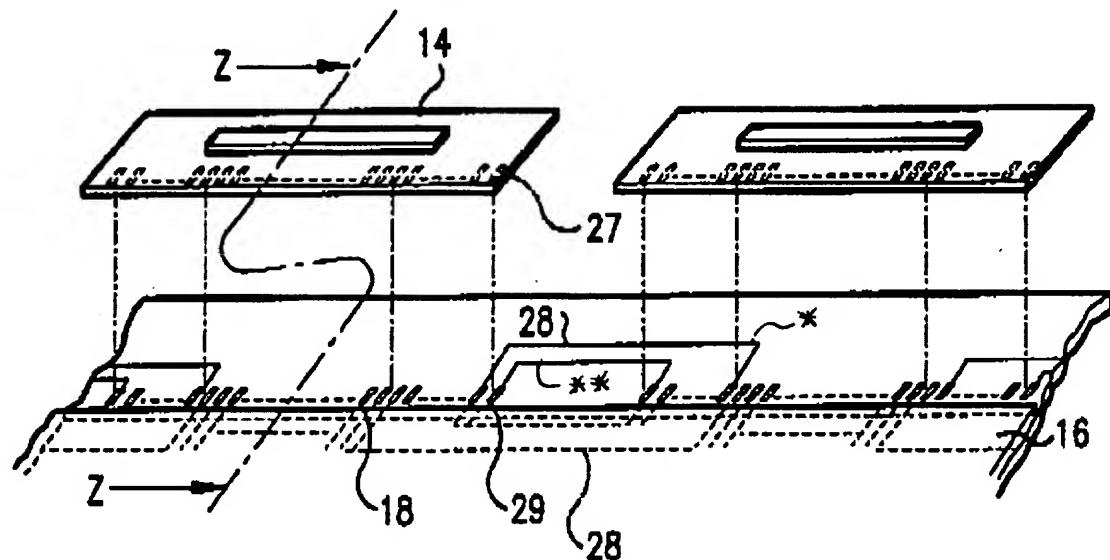

FIG.14

Regarding claim 15, Uchiyama discloses the panel-side wiring as connecting the third wiring path of the first board to the second wiring path of the second board (Figure 14 element 28, line marked with “**” above).

Regarding claim 16, Uchiyama discloses the panel-side connection wiring as not connecting any of the first, second, and third wiring paths of the second board to the first wiring path of the first board (Figure 14).

Claims 2-7, 12 and 13 are allowed.

The following is an examiner's statement of reasons for allowance:

Arguments and amendment filed on 4/6/06 are persuasive in overcoming the rejection of claims 2-7, 12 and 13. The prior art fails to disclose or suggest a display device having wiring boards with identical element-connected and non-connected board side wiring groups as proposed in which the element-connected wiring of the first wiring board and the first non-connected wiring of the second wiring board are electrically connected and the first non-connecting wiring of the first wiring board is connected to the second non-connecting wiring of the second wiring board and the element-connected wiring of the second wiring board is not electrically connected to the board-side wiring group of the first wiring board.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
